**Subject: Microsemi Ireland and REACH Compliance**

Dear Customer,

Thank you for your recent enquiry regarding the implementation of REACH. Microsemi Ireland is dedicated to complying with all environmental and health and safety legislation and to this end we set up a team to co-ordinate and monitor all matters relating to this directive.

Under REACH guidelines, Microsemi is a Downstream User and has a minor role of importer. As a consequence we instructed our suppliers to ensure that all the chemicals we use, have or will be pre-registered.

Please be aware that the REACH compliance of our products is based on declarations of intent of our suppliers. All suppliers have confirmed their compliance in writing to Microsemi Ireland, therefore currently our products can be regarded as REACH compliant.

We do not envisage any issues relating to ongoing supply of products to your organisation as a result of the REACH regulations.

Additionally to the best of our knowledge, we can confirm that products supplied by Microsemi Ireland do not contain any of the Substances of Very High Concern under the REACH regulations.

Should you have any further concerns please contact: [aboyle@microsemi.com](mailto:aboyle@microsemi.com)

Thank you for your enquiry and we look forward to your continuing custom.

Yours sincerely,

**Anne Boyle,**  
Process Engineer
