RE: STEC Response to Mev Elektronik Service's Request for a REACH Certificate for the STEC Products.

Dear Katja Schlemo,

STEC Inc. keeps all of the material declarations received from the Manufacturer's of the components used in our designs in the Agile Product Governance and Compliance System. A Special report has been setup within this Agile PG&C System to review and report the presence of any of the first 15 proposed candidate list of substances of Very High Concern for authorization on the REACH SVHC list in excess of 0.1% or 1000ppm. STEC Inc. is prepared to supply a Summary Compliance Report along with a Full Substance Disclosure Report of all of the currently available information on the substances found in a specific STEC Product upon request. In addition STEC Inc. plans to develop new reports as more substances are released and added to the REACH SVHC list. Please visit the ECHA web site for current information on the EU REACH Program and their SVHC List ([http://echa.europa.eu/chem\\_data/candidate\\_list\\_table\\_en.asp](http://echa.europa.eu/chem_data/candidate_list_table_en.asp)).

STEC, Inc. is prepared to review specific products against the REACH regulation upon a customer's request. STEC, Inc. accepts no duty to notify or update users of any changes made to Material Declarations unless the material declaration updates or additions also change the compliance to international substance regulations.

STEC is committed to compliance with all environmental laws and regulations. Additionally STEC Inc. strongly supports the REACH overall objective of improving the protection of human health and the environment. To do this we will continue to monitor the content of all components used in our designs to assure compliance to the developing REACH regulation and other existing environmental laws and regulations.

STEC, Inc. as a supplier of Products assembled from 3<sup>rd</sup> party components relies on a combination of direct 3<sup>rd</sup> party substance analysis reports, material declaration reports from our suppliers and/or Certificate of Compliance from our suppliers prior to providing you with our Certificate of Compliance. To the best of our knowledge, the information that STEC relies on to determine compliance of our products is accurate and true.

If you have any additional questions feel free to contact me.

Yours sincerely

Sr. Component Engineer
